GitHub: github.com/winnaingsoe6666 | VibeCode Builder: vibecode.tours

PROFESSIONAL SUMMARY

Senior Full-Stack & AI Systems Engineer with 6+ years of enterprise engineering experience specializing in FinTech, core banking platforms, distributed microservices (Java, Spring Boot, PostgreSQL, Oracle), and high-velocity **AI-Assisted Software Engineering**.

Certified in **ITPEC Fundamental IT Engineer (FE - Japan IPA mutual recognition)** and holds **7 Anthropic Official Certifications** covering Claude Code, Model Context Protocol (MCP), and Multi-Agent Systems. Expert in bridging complex **Requirements Definition (要件定義・業務理解)** with **Spec-Driven Development (SDD / SpecKit)**, **Test-Driven Development (TDD)**, and **AI Agent orchestration**. Combines enterprise-grade architectural discipline (zero-downtime banking systems, OWASP compliance, strict code review) with cutting-edge AI tooling (Claude Code, Cursor, Superpowers) to deliver reliable, production-ready systems at 5x–10x velocity.

ENTERPRISE AI ENGINEERING & CORE COMPETENCIES

Mapped to Japanese & Global 2026 Production Standards (Digital Skill Standard & Enterprise Requirements)

- 1. Production AI & Agentic Integration (業務システム実装):** Architect and implement production-grade AI agents, subagents, and Model Context Protocol (MCP) integrations (e.g., PostgreSQL MCP, GitHub MCP, Playwright MCP) connected to live enterprise business logic and REST APIs rather than isolated chatbots.
- 2. AI Output Verification & Code Review (コード検証・品質担保):** Apply 6+ years of FinTech rigor to inspect, debug, and audit AI-generated code. Eliminate hallucinations, race conditions, and performance bottlenecks via deterministic test suites and strict code review.
- 3. Requirements Definition & Spec-Driven Development (要件定義・SDD):** Master of translating ambiguous business workflows (業務フローの整理) into formal, testable specifications using **SpecKit** (`/speckit.specify`, `/speckit.plan`, `/speckit.tasks`) and **TDD (Test-Driven Development)** prior to code generation.
- 4. Data & Context Engineering (コンテキスト管理・データ設計):** Optimize LLM context windows using persistent knowledge graphs (`claude-mem`), project state tracking (`Context7`), relational database indexing, and Supabase/PostgreSQL schema design.
- 5. Security, Access Control & AI Governance (セキュリティ・ガバナンス):** Enforce least-privilege access for AI tools (read-only MCP boundaries, sandboxed execution), protect proprietary business/banking data from model leakage, and implement audit logging and input sanitization.

6. **Cost Management & LLMOps (コスト最適化・運用監視):** Manage model routing, token budgeting, LiteLLM proxies, and fallback strategies to ensure high availability and predictable operational costs.
 7. **AI Tooling Mastery & Velocity (AI開発ツール習熟):** Deep hands-on proficiency with **Claude Code CLI**, **Cursor**, **Superpowers framework**, and **GSD (Get Stuff Done)** autonomous execution, backed by official Anthropic certifications.
-

TECHNICAL SKILLS

- **AI & Agentic Engineering:** Anthropic Claude Code (CLI/Agentic), Model Context Protocol (MCP), Multi-Agent Orchestration, Subagents, Speckit (SDD), Superpowers Framework, LiteLLM Proxy, Prompt Engineering Playbooks, Context Management (**claude-mem**, **Context7**), RAG Fundamentals, AI Code Review & Verification.
 - **Methodologies & Architecture:** Spec-Driven Development (SDD), Test-Driven Development (TDD), Requirements Definition (要件定義), Business Workflow Modeling (業務フロー整理), Microservices Architecture, Domain-Driven Design (DDD), SOLID Principles, System Modernization.
 - **Backend:** Java (8/11/17/21), Spring Boot, Spring Security, Spring MVC, Spring Batch, RESTful APIs, NestJS, Node.js, MyBatis, Hibernate/JPA, Java Swing.
 - **Cloud & DevOps:** Google Cloud Platform (GCP - Cloud Run, Cloud Storage, Compute Engine, IAM), AWS (Lightsail, EC2), Docker, Docker Compose, Jenkins, GitLab CI/CD, GitHub Actions, Linux (Ubuntu, Rocky Linux, WSL).
 - **Frontend:** Angular (JS/TS), React, Next.js (App Router), TypeScript, Tailwind CSS, shadcn/ui, HTML5, CSS3, Vite, JSP.
 - **Databases & Storage:** PostgreSQL, Oracle PL/SQL, MySQL, Supabase, Redis, Stored Procedures, Schema Migrations (Flyway, Prisma).
 - **Testing & Quality Assurance:** JUnit, Mockito, Cypress, Selenium WebDriver, Playwright, Integration Testing, Performance/Load Testing, Regression Testing.
 - **Tools & Platforms:** Git, GitHub CLI (**gh**), SVN, Maven, Gradle, Jira, Swagger/OpenAPI, JBoss, Apache Tomcat.
-

PROFESSIONAL EXPERIENCE

MSIS Company | Remote

Senior Software Engineer | February 2025 – Present

- Architected and deployed microservices on the Mifos Fineract open-source banking platform, supporting core enterprise financial workflows with high availability.
- Designed secure, scalable RESTful APIs using Spring Boot and Spring Security, enforcing strict authentication, RBAC, and data privacy policies.
- Successfully delivered 3 new banking microservices from initial requirements gathering to production release.
- Developed automated batch processing schedulers using Spring Batch and cron triggers, reducing manual operational interventions by 60%.
- Built responsive financial reporting dashboards using Angular integrated with containerized backend services via Docker and CI/CD pipelines.
- Explored Cloud Run and GCP services for lightweight service deployment and container orchestration.

DIR-ACE Technology (DAT) | Yangon, Myanmar

(Daiwa Institute of Research Group — Japanese Enterprise Offshore Center)

Senior Software Engineer | April 2023 – January 2025

- Led offshore engineering teams for Japanese enterprise clients, delivering mission-critical financial and Stock Exchange operational systems across full SDLC.
- Spearheaded **Requirements Definition (要件定義)**, business process modeling, and detailed system design documentation in close collaboration with Japanese stakeholders.
- Mentored 11 engineers (including 4 junior developers), establishing rigorous code review guidelines, coding standards, and automated unit testing protocols.
- Automated client-side operational workflows using Shell Scripting and VBA, saving 15+ hours weekly in data processing routines.
- Awarded the prestigious **President's Award for Productivity & Quality Assurance (2024)** for outstanding delivery reliability and zero-defect deployments.

Software Engineer | April 2022 – March 2023

- Re-engineered and optimized complex PostgreSQL stored procedures for SIMM (Standard Initial Margin Model) calculations, reducing calculation time and accelerating risk reporting.
- Designed and delivered an interactive executive KPI reporting dashboard using Angular, giving leadership real-time visibility into project budgets, schedules, and resource allocation.
- Diagnosed and resolved mission-critical JBoss application server concurrency bottlenecks, ensuring high system uptime during peak market trading hours.

Junior Programmer | March 2020 – April 2022

- Engineered an end-to-end automated regression testing suite using Selenium for stock price derivative calculation systems, drastically cutting manual QA cycles.
- Refactored legacy Oracle SQL queries and stored procedures, enhancing database performance and schema maintainability.
- Developed Java Swing and Spring MVC trade processing applications with full JUnit coverage.

KEY PROJECTS & AI-ASSISTED SYSTEMS

CrossMart (Team-05) — Cross-Border E-Commerce Platform

Vibe Code Tours Cohort 1 Flagship Project | 2026

Tech Stack: Next.js 15 (App Router), NestJS, PostgreSQL, Prisma, Supabase, BullMQ, Tailwind CSS, shadcn/ui

- Built a cross-border e-commerce platform bridging regional supplier markets using **Spec-Driven Development (SDD)** with structured acceptance criteria.
- Led backend API modules and database modeling, integrating Supabase authentication and BullMQ background queues for inventory tracking and logistics status updates.
- Maintained automated CI/CD pipelines with GitHub Actions, enforcing automated linting, security audits, and regression tests on all pull requests.

Evolvia — Personal AI Operating System & Multi-Agent Architecture

Autonomous AI Orchestration & Architecture Platform | 2026

Tech Stack: Claude Code CLI, Multi-Agent Architecture, Model Context Protocol (MCP), Docker, Node.js/TypeScript

- Architected the comprehensive operational blueprint ([AGENTS.md](#), [CLAUDE.md](#)) establishing agent roles, orchestration rules, context isolation, and quality release gates.
- Implemented **Superpowers framework** workflows and autonomous execution modes (GSD), equipping specialized subagents (Architecture, DB, QA) with strict execution boundaries.
- Integrated standard and custom MCP servers to facilitate deterministic file system operations, database schema validations, and automated quality checks.

ShareShelf — Community Resource Library Platform

AI-Assisted Full-Stack Application | 2026 | [Live App](#)

- Developed a community borrowing web platform using Spring Boot and modern frontend technologies.
- Integrated a custom **PostgreSQL MCP server** ([@modelcontextprotocol/server-postgres](#)) providing secure, read-only schema inspection and query validation to AI coding assistants during development.
- Created custom Claude Skills ([analyze-sharesshelf-db](#)) and Subagents ([db-assistant](#), [qa-bot](#)) to automate schema migration reviews and TDD test execution.

JLPT Online Registration Platform

DIR-ACE Technology | November 2020 – May 2023 | [jlpt-maja.org.mm](#) **Tech Stack:** Spring Boot, Spring Security, PostgreSQL, Cypress, 2C2P Payment Gateway, Rocky Linux

- Engineered high-concurrency backend architecture capable of sustaining 5,000+ concurrent applicants during registration rushes with zero downtime.
- Integrated 2C2P payment gateway with automated transaction reconciliation and failure-recovery mechanisms.
- Authored full Software Requirements Specifications (SRS), operational manuals, and disaster recovery procedures.
- Honored with the **President's Award for Best System Development**.

EDUCATION & CERTIFICATIONS

- **Anthropic Official Certifications (Skilljar):**
 - Claude Code 101 ([Verify](#))
 - Claude Code in Action ([Verify](#))
 - Model Context Protocol (MCP) Introduction ([Verify](#))
 - Subagents Introduction ([Verify](#))
 - Agent Skills Introduction ([Verify](#))
 - Claude Platform 101 ([Verify](#))
 - Claude 101 ([Verify](#))
- **Fundamental Information Technology Engineers Examination (FE) | 2023**
ITPEC (Information Technology Professionals Examination Council) — Mutual recognition with Japan

Information-technology Promotion Agency (IPA)

- **Bachelor of Engineering (Electronics)** | 2018

Technological University, Kalay, Myanmar

LANGUAGES

- **Burmese:** Native
- **English:** Professional Working Proficiency
- **Japanese:** Basic Conversational (Familiar with Japanese enterprise IT terminology: 要件定義, 基本設計, 詳細設計, 単体テスト, 結合テスト)
